

Open Position at Alithea Genomics

Scientific Marketing Specialist – 80%-100%

About Alithea Genomics

Alithea Genomics is a global leader in large-scale transcriptomics and transcriptomics solutions for drug discovery. We are committed to making an impact on biomedical research by delivering high-quality RNA-seq services and kits to researchers worldwide. At the same time, we are continuously expanding our range of high-throughput transcriptomics products and applications through ongoing research and development efforts. Our multinational team comprises passionate entrepreneurs, engineers, and scientists who are dedicated to creating new solutions and driving the growth of the transcriptomics field.

Position

We seek a creative, proactive, and motivated individual to join our marketing team as a **Scientific Marketing Specialist**. The successful candidate will be involved in all aspects of marketing our cutting-edge and high-throughput RNA-seq products, including website updates, blogs, SEO optimization, conference and event organization, social media updates, webinars/seminars, and more.

Responsibilities

- Develop and implement marketing strategies to promote our RNA-seq products.
- Update and maintain the company website with new content and product information.
- Write and publish blogs, articles, and other content to engage our target audience.
- Optimize content for search engines (SEO) to increase online visibility.
- Organize and manage conferences, events, and webinars to showcase our products.
- Manage social media accounts and create engaging posts to build our online presence.
- Collaborate with the R&D team to understand product features and translate them into compelling marketing messages.

Qualifications

- Experience in the field of next-generation sequencing (NGS), ideally RNA-seq, single-cell, and/or bulk sequencing.
- Experience in the field of drug discovery and/or biomarker discovery is a plus.
- Excellent writing and communication skills, essential for drafting effective marketing messages and news.
- A remarkable sense of aesthetics and intuition for what looks good and is catchy to a scientific audience.
- Strong organizational and project management skills.
- Ability to work independently and as part of a team.

Location

Fully remote US-based work.

How to apply

To apply, please send your CV and Cover Letter to rdainese@alitheagenomics.com
